

EEL EYE

ARTIST'S STATEMENT

The creative act for me seems to be a magical act resulting in an unlimited potential for realization or manifestation.

Born in 1974 I have made images and sound my entire life. I am an accomplished artist, having exhibited my paintings in many museums galleries, and international publications. Recently participating in shows produced by the Cannibal Flower group in Los Angeles, as well as Hangar 1018 Thinkspace and Infusion galleries. A highlight of my gallery experience was having my work shown beside Dali and Mark Tobey at the Lancaster museum of Art in my hometown.

I also worked as a camera assistant for over three years at Voelkerstudio.com photographing celebrities, resulting in commissioned work, brief stints on television and fueling my interest in photography and film.

I have been in many experimental bands/ performance art groups manipulating and sculpting sound live at clubs and other venues throughout Southern California.

I keep diaries, scrapbooks, sketchbooks and I also like to vandalize books of fine art, creating UN-books in an attempt to destroy art history.

I am interested in dreams, chance, synchronicity, time travel, the mystical, the mundane, the fantastic, and absurd.

I currently live and work in my studio at Das Bauhaus, located in California's San Fernando Valley.
